*"The **elimination of Bin Laden**, if followed by a year or more without another **major AQ operation** against the U.S. would lead many Americans to believe that **the time had come** to declare **victory in the "war on terrorism"** and move on to other concerns."* (499)

GLOBAL SOLUTION INITIATIVE 2

Current Situation: AI systems are replacing older systems, moves are deffensive yet offensive. One of the code that is enforcing its will is the Russian led attempt to unify Europe under a more advanced flag (Imperial Code) the other is UK and Anglo Saxon led AI expedition to unify humannity in a Gengster Code. Commie Code is the Chinese version, which probably has both imperial and gengster elements.

Suspicious: Seems like a seven front war on Eurasia?

If all these wars escalate all of Eurasia might fall towards China, which could end in a 60000 year long system of Communism.

Pentagon Budget secured. Also if another two three expensive regional wars are fought in Eurasia USA might go even more bankrupt. (29 Trillion USD in Debt already) Could result in a pancake collapse of all Anglo Saxon Governments which would lead to the privatisation of given Anglo Saxon countries. Who would purchase it? Their intelligence communities. Just like the USSR was privatised towards out „Kibaszott Gazdag Barátaink” ? Probably.

Democracy 2.1 = Vote on Program Priorities and Operations instead of people.

Politicians are raised from early childhood like Chinese communist party does but better: Stepping-stone democracy:

3-8 Early Childhood Observation Period

8-12 Behaviour and Merit period

12-15 International Experience

15-18 Youth Years: in Crowd Behaviour

18-28 Young Adulthood Behaviour

28-35 Becoming

*The United States' ability to **deal with future threats** will depend on its **performance in current conflicts**. To be blunt, to fail -- or to be **seen to fail** -- in either Iraq or Afghanistan would be a **disastrous blow to U.S. credibility**, both among friends and allies and among **potential adversaries**.*
