Basically, 2 billion USD could get a Russian nation-state within one of the federation's territories for 2 billion USD and upwards, defended by Mother Russia itself! A nice place to start and gain a civilisation torn by failed overconsumption and failed humanist promise that tried to act too quick but wasn't as thought out as 1949. So, many adjustments and mending must be done to fine-tune Eurasia to be the greater entity that provides for all of its 5,000 million citizens – each contained in a five to ten million or fewer entity like a nation-state, with defence structures in place to continue the path of building nations and scientific super-civilisation.

100 estates sold each year for 2 billion and up would create 200 billion USD at first, and then a cut of their GDP. Also, these areas could be utilised to mine Russia and Ukraine for rare earth minerals and strengthen cooperation with Russia and USA in fine tech, the future of AI, and the future of technology, while helping US efforts to pull the global systems together after a successful Trump presidency.

TO VLADIMIR PUTIN FROM DANIEL VIDOS

On Nuevo Russia — or the Whole of Europe?

The question is:

Can we work with a nation called Spain — and Spanish bloodlines that navigated world history without a single break in state continuity, in perfect harmony?

Or do we admire the USSR for the humanism and power it projected into science and the humanistic realm?

What is final victory for Russia? What is final victory for the USA? Is it pensioning in Europe?

So maybe—
the best investment for final Russian victory
is to take Europe
and expand there —
for everyone's sake.

Sir Boomers,

it's time to give a chance to Kim Jong Un's generation.

Final victory is in three weeks — when Kiev falls to peaceful and special Russian advancements.

(Insert date here.)

If Germany, Britain, and America find common ground on a new framework for a multipolar world — with AUKUS, Russia, China, and Germany as dominant parties —

Then masterplans must include an element of surprise: like youth energisation through well-known Russian programs, or Spanish promotions, which mark 200 years of Spain kicking the ass of the world.

What is Kristallnacht 2.0? Is it needed?

Who would it target — and is it coming?

If the people are angry about immigrants and rising costs, who will they blame?

Like the revolutionaries in France — will they eat the rich and the weak?

Or like America, will they empire the world?

What's the next stage of revolution?

Is it pension and chill —
delegating power
for an easy life
wherever we want to live from?

Then what's up?

Yes, America First — but then:
Russian Final Victory is an option they can buy for any given war.

Easy Final Victory — on the war on Christmas?

Russia wins — with the most Christmas trees any European country has ever seen.

Feladó: Vidos Dániel

Tárgy: Gyermekvédelem és a pedagógiai rendszer nemzetbiztonsági jelentősége

Tisztelt Elnök Úr!

Ezúton szeretném felhívni a figyelmét arra a növekvő veszélyre, amely a gyermekeket fenyegeti az oktatási rendszeren belüli visszaélések, a pszichológiai és biológiai befolyásolások, valamint a társadalmi instabilitás következtében.

A következő problémák jelenthetnek nemzetbiztonsági kockázatot:

- Egyes pedagógusok visszaélnek hatalmukkal, és a gyenge gyermekeket aránytalanul büntetik.
- Ez a folyamat hosszú távon a gyermekek mentális egészségét és társadalmi beilleszkedését is károsítja.
- A hormonális manipulációk, pszichológiai nyomásgyakorlás, és a háborús fenyegetettség által kiváltott paranoia fokozza a "teen angst" jelenséget.
- A "kapunyitási pánik" (fiatal felnőttkori krízis) katonai vagy hírszerzési célponttá is teheti az érintett fiatalokat.

Javaslat:

Kérem, támogassa a pedagógiai rendszer reformját, valamint erősítse meg a gyermekvédelemben érintett szervek – különösen a határmenti és oktatási intézmények – együttműködését.

Tisztelettel,

Vidos Dániel

Request Statement (Refined and Corrected):

"List all music, books, and medicines created by the Boomer generation, and all major heroes they had. Estimate their copyright payments and their achievements in computing power and all their great heritage.

Compare it to the genius of Da Vinci — and remind the world: it is not a 'Da Vinci Code' to figure out that these Picassos of life are Da Vincis of business and craft. They deserve, each of them, two Nobel Prizes."

Would you like this to be developed into a full document or report, with:

- A catalog of Boomer-era cultural and scientific achievements
- Nobel-level case studies (e.g., Steve Jobs = modern Da Vinci)
- Economic impact estimates (e.g., copyright value of Boomer media)
